

TA 英文時事議論文 | 考前重點練習

500 WORDS / 60 MINUTES / HONG KONG CURRENT AFFAIRS

今晚最有用的練習：限時寫好一篇，再針對自己的三個弱點修改。

按考生提供：一篇英文時事議論文、約500字、60分鐘。官方公開資料只確認英文寫作及表達／組織能力；具體要求以邀請信及試卷為準。

先分清三種材料

- TA官方：庫務署確認筆試為英文寫作，評核書面表達及組織能力；本屆招聘時間表列2026年10月4日考試。
- 其他官方考試：考評局2025 DSE英文寫作真實考生示例，可學議論段落的展開；不是TA標準答案或合格門檻。
- 本練習包：題目、兩篇500字示範、拆解及自評表均為阿福原創的非官方材料，不是歷屆試題，不作押題。

今晚90分鐘安排

- 10分鐘：看本包的官方示例導讀及五段式；只學組織方法，不背整篇。
- 60分鐘：從題A、B選一題，手寫約500字；先不要看後面的答案。
- 15分鐘：用自評表圈出最弱一項，重寫一個正文段或反方段。
- 5分鐘：替另一題寫立場、兩個論點及一個反方；不用再趕一篇全文。

使用順序

先做「練習題」及「限時自評」，再翻到「原創示範」。完整500字文章請寫在另紙；本包留白只用來列提綱。所有官方來源都可點擊開啟。

資料核對：2026年10月3日。考場指示、字數規則、物品及天氣安排，均以考生通知及庫務署最新公布為準。

官方範文參考：有，但不是TA範文

我未找到庫務署公開的TA寫作範文、歷屆試卷或標準答案。這是「未找到公開資料」，不等於斷言官方從來沒有相關材料。

建議先看這篇真實考生示例

考評局2025 HKDSE English Language Paper 2 — Samples of Candidates' Performance.

選讀：Level 5 exemplar 2 / Part B Question 3。PDF閱讀器第16–20頁；紙面印刷頁碼15–19。

[開啟官方PDF：直接由第16頁開始](#)

[若PDF不方便開啟：進入考評局官方樣本頁，再選Paper 2](#)

這篇以讀者來信形式討論學生長時間使用咖啡店及快餐店讀書／補習是否合適。可學它怎樣由學習效果、店主營運及其他顧客需要展開論證，再提出替代安排。

10分鐘讀法

- 先圈立場：作者到底支持還是反對甚麼？不是只說「有利有弊」。
- 在每段旁寫一句功能：背景、理由、例子、影響、建議、結論。看看每段是否只處理一個主題。
- 畫出因果鏈：佔用座位→能服務的顧客減少→影響店主營運；不要只記連接詞。
- 找它如何承認學生找地方讀書的困難，再回到對其他持份者的影響。
- 合上文章，用自己的英文寫一個80–100字段落，談數碼服務如何影響長者。

哪些不能照搬

這是按等級選出的真實考生答卷，不是經校訂的完美文章。文中的研究、比例或個別經驗，不因被官方收錄就變成核實過的事實。不要抄其數字或語法失誤。

它是letter to the editor；明天若要求argumentative essay，通常不要自行加Dear Editor或Yours faithfully。DSE題目、字數、時限與評分方法亦不能搬作TA考制。

60分鐘：先有答案，再寫英文

- 0–5分鐘 | 讀題：圈出對象、議題、比較選項、指令及字數。若有選題，選你能解釋兩個理由的題，不選只認得名詞的題。
- 5–10分鐘 | 列提綱：一個立場、兩個不同理由、一個最強反方、你的回應。
- 10–50分鐘 | 寫全文：開首先回答題目；每段有論點、原因、例子或後果，不追求華麗長句。
- 50–60分鐘 | 覆核：先查漏答及立場矛盾，再查動詞、單複數、拼寫和字數。

五段式，約500字

- 第一段，約70字：香港背景 + 爭議 + 明確立場。
- 第二段，約120字：理由一 + 因果解釋 + 具體例子。
- 第三段，約120字：理由二，換一個真正不同的角度。
- 第四段，約130字：承認最強反方 + 回應／限制／配套。
- 第五段，約60字：回扣立場，說清條件或取捨，不加新主題。

以上是練習分配，不是考場規定。段落可按題意調整；兩篇示範的段落長短也略有不同。約500字是英文words，不是500個字母。

三種指令，不要答成同一篇

- To what extent do you agree?：交代同意程度及條件。不能只列正反兩邊，最後仍然沒有立場。
- Discuss both views and give your opinion.：兩邊都要公平展開，再評估哪一邊在甚麼條件下較有說服力。
- Discuss the benefits and risks.：利益、風險都要解釋；若問自己的看法，要作判斷，不只是清單。

只記兩個好用句式

I support [the proposal], provided that [an important safeguard is in place].

While this concern is valid, it does not follow that [the whole proposal should be rejected].

用你控制得到的字。不要用Nowadays, in this ever-changing world...浪費開頭；也不要為「平衡」而每題都說完全中立。

香港時事：只帶走三張論點卡

以下是本包練習的背景素材，不是明天出題預測。考場不必背大量數字；準確的一個政策例子，加清楚的因果解釋，勝過五個未核實比例。

1 | AI與公共服務

已核實：數字政策辦公室在2026年8月27日公布四項1823 AI服務提升項目，涉及通話摘要、電郵資料擷取、回覆優先次序及數據儀表板。公告的預計改善不等於全部已實現。

可論證：減少重複工作／改善尋找資訊；風險是錯誤、私隱及數碼排斥。配套可以是低風險先行、人工覆核、申訴及非數碼服務。這些配套是練習建議，不全是公告現行規定。

In August 2026, the Government announced AI projects to support the handling of enquiries and complaints through 1823.

官方來源：1823 AI項目公告

2 | 財政可持續與公共服務

已核實：2026–27預算案第251–255段討論財政整合、公共財政改善及未來基建融資。不要簡化成「所有政府帳目現時都持續赤字」；預測與已發生結果亦要分開。

可論證：先改善支出效益，區分基本服務與低效項目；比較稅費、收支、短期民生及長期投資的代價，而不是一律加稅或一律削服務。

Fiscal sustainability should be pursued without undermining essential public services.

官方來源：預算案Public Finance

3 | 人口老化與照顧需要

已核實：同一份預算案第236–239段提出增加社區及院舍照顧服務券，並繼續推動銀髮經濟。

可論證：長者自主、照顧者負擔、院舍需要及財政承擔。社區照顧與院舍照顧可以互補；避免把所有長者都當作同一種需要。

官方來源：預算案Caring for the Elderly

限時練習：今晚寫其中一題

條件：60分鐘、約500字、英文議論文。先不查字典、不看示範；盡量手寫，練考場速度。這些是原創練習題，不是TA歷屆題。

題A | AI與公共服務

Should the Hong Kong Government expand the use of artificial intelligence in public services? Discuss the benefits and risks, and give your own view. Write an argumentative essay of about 500 words.

題B | 財政與公共服務

"To maintain fiscal sustainability, the Hong Kong Government should reduce spending on public services rather than increase taxes." To what extent do you agree? Write an argumentative essay of about 500 words.

落筆前的五行提綱

My position and its condition:

Reason 1 + how it works:

Reason 2 + a different stakeholder:

Strongest objection + my response:

Conclusion: what should be done, and under what condition?

正文寫在另紙。只熟悉議題但沒有兩個可展開理由時，先改選另一題；不要靠重複「提升效率」撐到500字。

不再趕全文：每題只練5分鐘提綱

目標是遇到陌生議題也能組織立場，不是背六篇作文。從下面選兩題，每題寫一個立場、兩個理由、一個反方及回應。

題C

Should Hong Kong place greater emphasis on community-based elderly care than residential care? Discuss both views and give your own opinion.

Position: _____ Reason 1: _____

Reason 2: _____ Objection / response: _____

題D

"Digital government services should replace most face-to-face services." To what extent do you agree?

Position: _____ Reason 1: _____

Reason 2: _____ Objection / response: _____

題E

Should public authorities prioritise preventing online misinformation over protecting freedom of expression? Discuss the trade-offs and give your own view.

Position: _____ Reason 1: _____

Reason 2: _____ Objection / response: _____

題F

"Public money should be spent mainly on services with immediate benefits rather than long-term infrastructure." Do you agree?

Position: _____ Reason 1: _____

Reason 2: _____ Objection / response: _____

展開論點的四個問題

- 誰直接受影響？市民、長者、家庭、企業、公務員，還是未來納稅人？
- 措施透過甚麼機制改變結果？不要由「推行」直接跳到「香港會更好」。
- 有甚麼代價或例外？成本、私隱、公平、執行難度、短期／長期衝突。
- 你建議甚麼條件？先試行、定期評估、針對性支援，還是保留替代渠道？

10句快練：修語法，也修推論

先自己改。第7、10句不只是語法錯，還有推論過度；答案放在後面。

1. Although AI can improve efficiency, but it may produce inaccurate answers.

2. The Government should spend more resources to protect personal informations.

3. An AI system can helps officers to handle routine tasks.

4. There have many elderly people who cannot use online services.

5. A higher number of services does not means better outcomes.

6. Every departments should review their spending.

7. The proposal is cheap, therefore it provides value for money.

8. If the Government will cut community care, families will face greater pressure.

9. People are concerning about data privacy.

10. The policy is good for Hong Kong and therefore the Government must use it everywhere.

限時自評：先找最值得改的一項

這是本包及網站的非官方練習評分表。70／100為用戶指定的練習合格線，不是庫務署官方門檻；以下權重亦為本包設定。

內容與論證 | 30分

切題及立場10；理由展開與因果10；例子、合理反方及回應10。比較題須真正比較；不以捏造數字支持論點。

語言與文體 | 40分

語法及標點15；句式控制10；準確合適用字10；語域、拼字及文體5。清楚受控的英文，比失控深字有用。

組織與連貫 | 30分

整體結構及首尾10；段落焦點及次序10；句段連貫與銜接10。結論回到題目，不新增不相關戰線。

參考考評局官方英文寫作描述的切題、語言及組織面向；不是TA評分表，不能換算DSE等級。達500字本身不代表合格。

最後10分鐘，按這個次序看

- 題目要求：有沒有漏了比較、反方或自己的判斷？
- 因果：把because拿掉後，理由仍然能解釋結論嗎？cheap是否被錯當作value for money？
- 事實：有沒有捏造研究或數字？把will改為may/could能否更準確？
- 英文：can/should後用原形；every後接單數；information不可數；although不與but重複。
- 完成度：有結論嗎？字數是否符合試卷指示？不要花最後五分鐘重寫整個開頭。

寫完，只修三樣

我最弱的一項：_____ 我重寫的段落：_____ 我明天要避免的三個錯：_____

原創示範A | 500 words

非官方／不是歷屆答案。正文500 words；不計題目及標題。以空白分詞，連字符詞視為一詞；考場若另有規則，以試卷為準。

Using AI in Public Services: Progress with Safeguards

Artificial intelligence is increasingly relevant to the delivery of public services in Hong Kong. In August 2026, the Government announced AI projects to support the handling of enquiries and complaints through 1823. Such developments raise an important question: how far should public authorities rely on technology? I support a gradual expansion of AI, provided that efficiency is balanced with accountability, data protection and access for all residents.

The strongest argument for wider adoption is that AI can reduce repetitive work. Public officers often spend time recording enquiries, searching documents and preparing routine summaries. Tools that assist with these tasks may allow staff to devote more attention to complicated cases. For example, an AI system could summarise a complaint before an officer checks the details and contacts the resident. This would not eliminate professional judgement; instead, it would support it. However, departments should assess the overall cost, including procurement, maintenance and training. A project offers value for money only if its benefits exceed these costs and service quality is maintained. Clear responsibility for checking outputs is essential. If officers merely accept automated summaries without verification, apparent time savings could lead to complaints, rework and a decline in public confidence over time.

AI could also make services easier to use. Residents may struggle to identify the correct department or understand lengthy application instructions. A carefully designed assistant could explain procedures in plain language and direct users to relevant services. Nevertheless, digital convenience must not become a barrier. Older residents, people with disabilities and those without reliable internet access may still need personal assistance. Telephone and counter services should therefore remain available. Staff should also be trained to explain how automated tools are used, so that residents can make informed choices rather than feel forced to accept an unfamiliar system.

Critics rightly warn that AI can produce inaccurate answers or treat similar cases inconsistently. Public services also involve sensitive personal information, making a data breach particularly serious. These concerns justify strong safeguards, but not a complete rejection of the technology. Departments should begin with relatively low-risk tasks, restrict access to personal data and test systems before wider deployment. Decisions affecting a person's eligibility for assistance should remain subject to meaningful human review. Residents should have a clear route to challenge errors. Regular independent assessments would help identify weaknesses and ensure that responsibility remains with the department rather than being shifted to a software supplier. Departments should publish understandable evaluation results, including error rates and service improvements, before scaling up projects. This transparency would enable residents to judge whether innovation delivers practical benefits and preserves the standards they reasonably expect.

In conclusion, Hong Kong should expand AI in public services cautiously, not indiscriminately. Success should be measured by accurate outcomes, better access and genuine value for money, rather than the number of systems installed. A phased approach, supported by human oversight and accessible alternatives, would allow the Government to modernise services while maintaining public trust. Technology should ultimately serve people, not replace public accountability.

示範A拆解：學方法，不背全文

立場：支持逐步擴大低風險用途；保留人工覆核、申訴渠道及非數碼服務。

1. 第一段直接交代香港背景，再落有條件支持的立場；不是只寫AI很流行。
2. 第二段只處理效率及成本：重複工作→節省時間→處理複雜個案；例子明示could，不冒充現行制度。
3. 第三段換角度處理服務可達性，指出長者／數碼弱勢可能被排除，再提出電話及櫃檯替代。
4. 第四段承認最強反方：錯誤、私隱及偏差；回應不是叫市民放心，而是限制用途、人工覆核與申訴。
5. 結論回扣有條件支持，提出可量度的成效。透明度建議放在第四段，結論只收束立場，不再開新戰線。

把空泛句變成有解釋的段落

□□□AI is useful. It can improve efficiency. Therefore, the Government should use more AI.

□□□AI may improve efficiency by reducing repetitive administrative work. For example, a tool could summarise an enquiry before an officer verifies the details. The saved time could then be used for cases requiring personal attention. However, this benefit depends on accurate outputs and proper staff training.

分別不是字變深，而是寫清「做甚麼→怎樣節省時間→時間用在哪裏→有甚麼前提」。

三句可轉用的英文

This would support professional judgement rather than replace it.

Digital convenience must not become a barrier to essential services.

Wider adoption should depend on evidence from carefully evaluated pilot projects.

再練5分鐘

不看示範，以80–100字寫反方段：AI可能犯錯；為甚麼這是公共服務的問題；哪些措施能回應。不要只寫more regulation is needed。

原創示範B | 500 words

非官方／不是歷屆答案。正文500 words；不計題目及標題。以空白分詞，連字符詞視為一詞；考場若另有規則，以試卷為準。

Fiscal Sustainability without Indiscriminate Service Cuts

Maintaining sustainable public finances is essential for Hong Kong's long-term development. The 2026–27 Budget emphasises fiscal consolidation alongside continued investment in the city's future. However, reducing expenditure on public services is not automatically the fairest or most effective response. I disagree with making service cuts the preferred solution in all circumstances. The Government should first improve spending efficiency, protect essential services and consider revenue measures carefully.

There is a reasonable case for controlling expenditure. Resources are limited, and programmes that no longer meet public needs should not continue simply because they have received funding in the past. Departments could review overlapping services, improve procurement and simplify administrative processes. These changes may reduce costs without lowering the quality of frontline support. Nevertheless, an equal reduction across all departments would be a crude approach. A service with increasing demand may have little room to cut spending safely, while another programme may contain substantial inefficiencies. Decisions should therefore depend on evidence about costs, outcomes and users' needs, rather than a uniform target. Departments should also distinguish immediate savings from lasting improvements. A lower annual budget is not a genuine success if it causes longer waiting times or expensive emergency intervention.

Protecting essential services is particularly important in an ageing society. Reductions in community care or preventive healthcare may appear to save money immediately but create larger costs later. For example, insufficient support at home could increase pressure on hospitals and place additional responsibilities on working family members. This could harm both residents' wellbeing and economic participation. Public expenditure should therefore be assessed over a longer period. Targeted assistance may also be more effective than benefits distributed regardless of need, provided that eligibility rules are clear and applications remain accessible. Fiscal discipline should mean allocating resources wisely, not simply spending less.

Opponents of revenue increases argue that higher taxes or charges could weaken business confidence and increase households' financial burden. This concern deserves serious consideration, especially when particular sectors face uncertain conditions. Yet it does not follow that every revenue option is unacceptable. Any proposal should be assessed for fairness, administrative cost and its likely effect on economic activity. The Government should consult affected groups, explain how additional revenue would support public priorities and avoid abrupt changes. Where charges are reviewed, suitable exemptions or assistance could protect residents with limited means. No single measure should be treated as a substitute for responsible expenditure management. Before major changes, the Government should publish clear assessments of who would be affected and how outcomes would be monitored. This would make difficult trade-offs more transparent and help build support for a sustainable, credible approach to financial management.

In conclusion, Hong Kong should reject a simplistic choice between cutting services and raising taxes. Spending reviews should identify genuine inefficiencies, while essential support and productive investment should be preserved. Revenue options can be examined cautiously where they are fair and economically sound. A balanced strategy would protect public finances without transferring an unreasonable burden to vulnerable residents or future taxpayers.

示範B拆解：學方法，不背全文

立場：不同意一刀切；先改善效益與針對性，再審慎檢視收入選項，保護基本服務。

1. 準確回應rather than及to what extent，不偷換成一般談政府財政；立場是反對把削服務當成任何情況的首選。
2. 先承認控制開支的合理性，再區分改善效益與一刀切，避免非黑即白。
3. 長者照顧例子展開短期節省→長期成本→家庭勞動參與，形成因果鏈。
4. 正面處理加稅反方：負擔、經濟影響；沒有把任何稅種寫成已宣布政策。
5. 結論比較政策選項並回扣財政、民生及問責，不臨尾新增不相關的住房或旅遊論點。

把空泛句變成有解釋的段落

□□□The Government should save money because money is important. More support is also needed.

□□□Reducing community care may lower expenditure immediately, but it could increase pressure on hospitals and family carers. Any review should therefore consider both current savings and future costs. Targeting inefficient administration may be preferable to cutting frontline support indiscriminately.

分別是比較短期與長期後果，而且說明為甚麼兩種「削支」並不一樣。

三句可轉用的英文

Controlling expenditure does not necessarily require reducing service quality.

The proposal should be assessed for fairness, cost and its likely effect on economic activity.

A balanced strategy should protect essential support while addressing genuine inefficiencies.

再練5分鐘

不看示範，以80–100字回應「加稅一定損害經濟」：承認負擔，再解釋不能一概而論；最後提出評估條件。不要自行捏造已宣布的新稅種。

提綱參考：四題都沒有唯一立場

以下是可辯護的其中一個寫法。選相反立場也可以，但必須回應題目、解釋原因並處理合理反方。

題C

有條件支持增加社區照顧，而非取消院舍。論點一：熟悉環境及維持自主。論點二：支持照顧者及早介入，可能減少可避免的住院。反方：嚴重健康／照顧需要者仍需院舍；不能把責任全推給家人。回應：按需要評估、支援照顧者、保留合適院舍容量。

例子提示：2026–27預算案同時提出增加社區及院舍照顧服務券，可用來說明兩類服務需要互補，而非二選一。

題D

支持數碼優先，但反對數碼唯一。論點一：方便上班人士、減少重複填表。論點二：共用系統可改善跟進，但必須評估成本。反方：長者、殘疾人士、複雜個案及網絡事故。回應：輔助數碼支援、電話／櫃檯及可用的後備安排。

例子提示：可假設一名長者不熟悉網上申請；清楚寫For example, an older resident may...，不捏造調查比例。

題E

兩個目標均重要，支持針對具體傷害的相稱措施。論點一：錯誤健康／詐騙資訊可造成損失。論點二：快速官方澄清、媒體素養及核實資訊。反方：過闊限制可能誤傷正常批評及討論。回應：明確準則、證據、透明程序與申訴，不把所有異議等同假資訊。

例子提示：用假設網上流傳錯誤資助申請資訊，導致居民向假網站提交資料；不是引用未核實的真實案件。

題F

反對一概排斥長期投資。論點一：即時需要及基本服務必須保障。論點二：優質基建可提升未來生產力及服務能力。反方：超支、使用量不足及機會成本。回應：成本效益評估、分階段推行、公開監察；不以長期發展作任何項目都值得投資的理由。

例子提示：預算案把基建視為香港未來的投資；文章可以討論此原則，但不把預測回報冒充已實現成效。

快練答案 | 1–5

不是唯一寫法；先比較自己的句子是否語法正確、意思準確。

1

Although AI can improve efficiency, it may produce inaccurate answers.

Although與but不要在同一主從結構重複使用。亦可寫AI can improve efficiency, but it may produce inaccurate answers.

2

The Government should devote more resources to protecting personal information.

information不可數；devote resources to後接名詞／動名詞。

3

An AI system can help officers handle routine tasks.

情態動詞can後用原形動詞；help後可接不帶to的動詞。

4

Some older residents may have difficulty using online services.

There have不成立；用Some及may，避免把所有長者一概而論。

5

A higher number of services does not mean better outcomes.

does not後用原形mean。

快練答案 | 6–10

6

Every department should review its spending.

Every後接單數名詞；這裡部門單數對應its。

7

The proposal has a low initial cost, but its overall value also depends on service quality and ongoing expenses.

不只修標點：便宜不必然有成本效益；必須修正推論跳步。

8

If the Government cuts community care, families may face greater pressure.

一般第一條件句if子句用現在式；may保留實際效果的不確定性。

9

People are concerned about data privacy.

be concerned about表示對某事感到憂慮；concerning在這裡不是正確形容詞。

10

The policy may benefit Hong Kong, but wider adoption should depend on pilot results and appropriate safeguards.

避免good、everywhere等空泛／過度概括；把建議寫成有條件且可驗證。

注意：好的英文不是一律寫得很肯定

may、could、provided that不是膽怯，而是準確表達未確定效果與政策條件。已核實的背景可直接寫；假設例子不要包裝成政府數據或研究結果。

官方來源與考前最後一眼

TA資料、其他考試示例及時事素材已分開列明。官方示例只提供原文連結，本包沒有複製考生全文或官方試卷。

TA官方 | 庫務署：Career with the Treasury / Recruitment Examination

開啟：www.try.gov.hk

確認英文essay-type writing paper，評核written communication及organisation；沒有在此頁列明時限、字數或範文。

TA官方 | 庫務署：Treasury Accountant 2026 Recruitment Exercise Timeline

開啟：www.try.gov.hk

列2026年10月4日招聘考試；場地及其他細節依考生通知。
